

Spiral Pulley Belt Speed Sensor

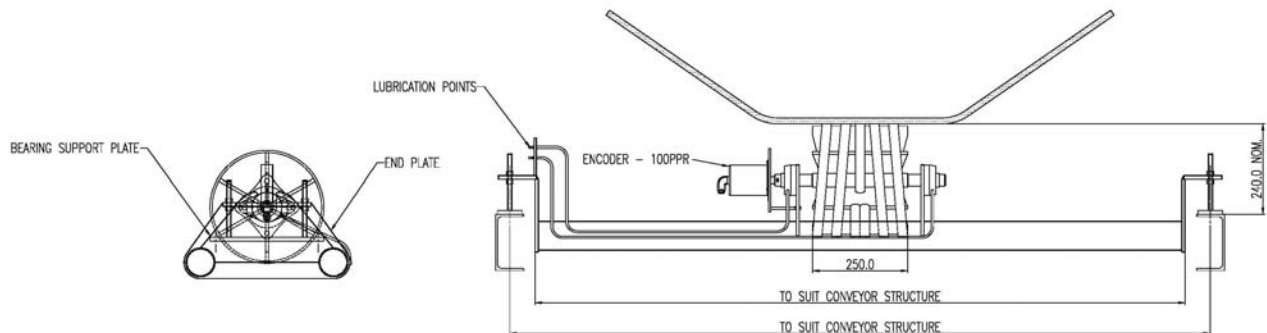

The Web Tech spiral pulley system operates with the full range of off the shelf Web Tech Belt Speed sensors. This includes the stainless steel increment encoder and proximity switch speed sensor arrangements.

The unique design encompasses the following features:

- Self cleaning action.
- Interchangeable speed sensor arrangements.
- Easy to install, align and maintain.
- Machined and balanced spiral pulley to increase bearing life.
- Remote grease points for the bearings (specify access side)
- Fully height adjustable galvanised frame.
- Optional stainless steel construction.

Stainless Steel Spiral pulley shown with the proximity switch.
